**THE POWER OF AR AND VR
1ST LTT ACTIVITY IN PIRAEUS,
GREECE
7TH TO 9TH APRIL 2025**

On April 7th to 9th, 2025, 2 EK Peiraia in Piraeus, Greece, hosted the first Learning, Teaching & Training Activity of our Erasmus+ project, 'The Power of AR and VR: Igniting Passion for Learning Through Innovative Technologies'. This successful event brought together partners and teachers from Croatia, Greece, Lithuania, Poland, Portugal and Türkiye.

The primary objective of this activity was the piloting of the project's first Intellectual Output (IO1). Thirty active teachers from various educational institutions across our six participating countries attended the presentation of the six completed Modules comprising IO1. The working teams presented the corresponding AR&VR activities professionally and dynamically, interacting meaningfully with the viewers. The piloting phase aimed to facilitate a thorough review and feedback process from both project partners and participating teachers on IO1 as a whole, as well as on individual Modules and their activities. This crucial step precedes the broader dissemination of IO1 within VET schools across all participating countries. The objectives of the IO1 piloting were successfully achieved over the three days, resulting in positive outcomes for the project team, creators, and participating teachers alike.
