WEBINAR “JOURNEY INTO IMMERSIVE EDUCATION: AR & VR APPLICATIONS” ATTRACTED OVER 280 REGISTRATIONS

Instituto Piaget hosted the webinar “Journey into Immersive Education: AR & VR Applications”, held within the Erasmus+ Project “The Power of AR and VR: Igniting Passion for Learning Through Innovative Technologies”, in collaboration with the project’s European partners.

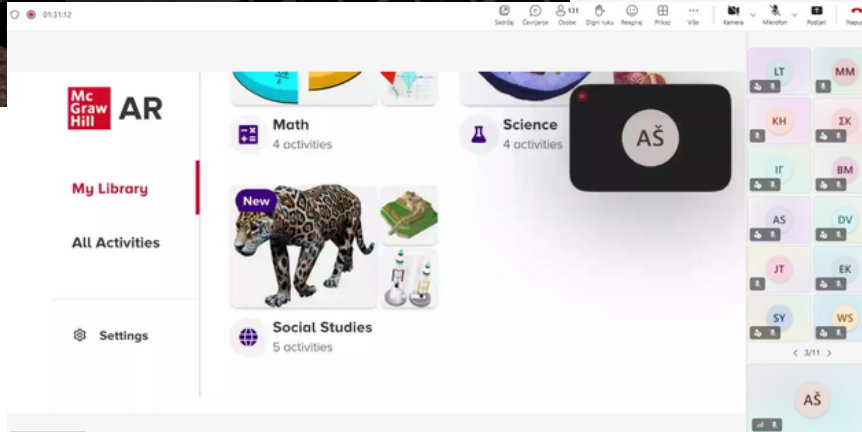

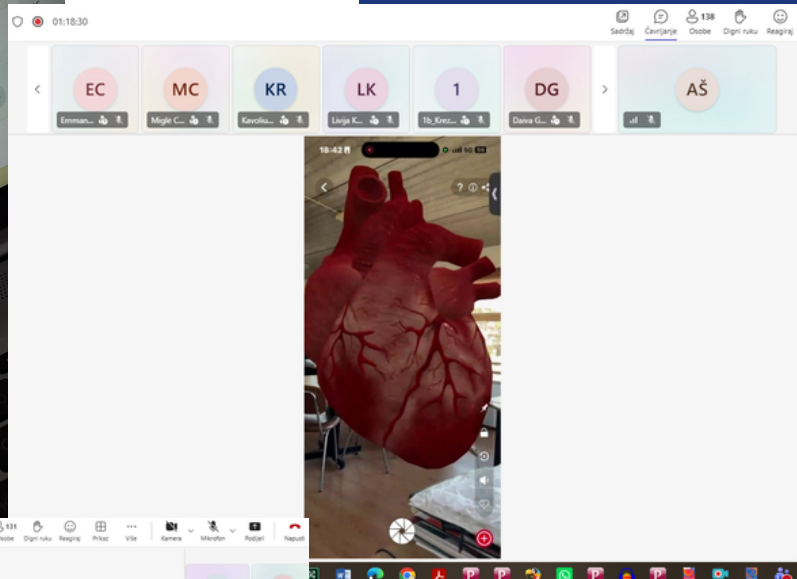

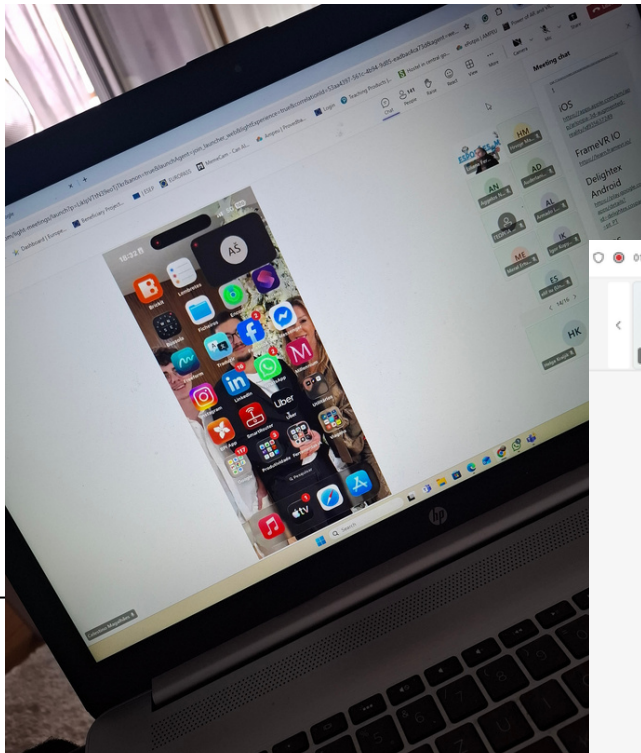

With more than 280 registrations, the initiative highlighted the growing interest of the educational community in immersive technologies and their potential to transform pedagogical practices. Throughout the session, innovative applications of Augmented Reality and Virtual Reality in educational contexts were explored, with particular emphasis on their contribution to more engaging, interactive, inclusive and digitally enriched learning experiences.

The webinar also represented an important moment for the international dissemination of the project, enabling the sharing of experiences, resources and perspectives on the pedagogical integration of AR and VR in teacher education, vocational education and training, and diverse learning environments. The strong level of participation reinforced the relevance of the work developed by the European consortium and Instituto Piaget's commitment to pedagogical innovation, international collaboration and the promotion of more dynamic and technology-enhanced educational ecosystems.
