NEWSLETTER 8

Final Meeting

The final meeting of the THE POWER OF AR AND VR FOR LEARNING THROUGH INNOVATIVE TECHNOLOGIES project was held over two intensive days filled with productive work, inspiring meetings, and an exchange of experiences.

During the meeting, the project achievements were summarised, the objectives reached were discussed, and issues related to the administrative and financial closure of the project were addressed. Further activities were also planned to ensure the sustainability and continued use of the project results after its completion.

As part of the meeting, INLED Company was visited, providing an opportunity to discover innovative solutions in the field of VR and storytelling. A demonstration of the use of VR at Paço dos Duques in Guimarães was also presented, and the modern teaching facilities at Piaget University were visited. The programme also included a shared lunch and a boat trip along the Douro River.

The meeting was hosted by Piaget University, whose hospitality and excellent organisation contributed to the success of the event. The meeting provided an important opportunity to strengthen international cooperation and conclude the project by reflecting on its achievements and future impact.
